

It has come to my attention that lobbyists from the National Association of Broadcasters (NAB) is actively lobbying legislators to restrict the services offered by XM radio and other satellite providers. I would like to go on record as being completely against this form of censorship.

I pay a monthly service fee for the express purpose of receiving broadcasts exactly like those offered by XM Radio. I do not support any action or legislation that restricts what I can receive through paid services. XM Radio supplies services not available by the monopolistic broadcasting industry, and it appears that their efforts to restrict the free speech of others simply to increase their bottom line goes against the tenets of the Constitution and everything that makes Free Enterprise work.

I respectfully request that you reject NAB Petition 04-160 and that you continue to block any attempt at restriction of services offered by paid providers.
